

# Ediom Systems Solutions

Value driven approach to  
Systems Engineering and  
Safety Assurance (SESA)

We start with the end in mind and tailor your SESA approach to deliver the right balance between compliance and value from the outset

Ediom Systems Solutions delivers a right sized framework with a risk based approach:

---

### **SYSTEM RISK**

We bring clarity and traceability to mitigate design risks “What do you have to achieve and how do you demonstrate you have achieved it?”

### **PERFORMANCE RISK**

Ediom minimises performance risk by using appropriate levels of safety, reliability and engineering analysis alongside effective systems assurance.

### **DELIVERY RISK**

Ediom reduces delivery risk by ensuring an integrated and realised capability is delivered, proven and successfully operationalised

## Contact us

---

**Aaron Miles**

Technical Director  
SESA

+61 438 572 155

**Aaron** is an experienced and effective Systems Engineering, Integration and Assurance Lead with over 20 years of experience in the defence, rail and road industries, supported by extensive experience in commercial negotiation and management.

Offering the ability to successfully lead delivery of complex systems integration projects and solutions whilst demonstrating a proven history of establishing key systems, engineering processes and functions. Highly skilled in developing a cohesive workplace environment and building high performing multi-disciplinary teams in complex commercial environments.

**Amanda Murney**

SESA Manager  
+61 422 150 692

**Amanda** is a Senior Systems Engineer with experience in complex developmental projects, rolling stock and rail infrastructure, technical project management, personnel management, resource and asset management, and performing at optimal capability in high-pressure environments.

Amanda possesses high level management, communication, interpersonal and relationship building skills and demonstrates astute judgement, problem solving and decision making. Highly motivated, self-starter with an exceptional work ethic, consistently driving positive, productive change and delivering timely results in line with organisational intent. Actively seeks out opportunities for professional development in order to enhance skillsets and technical knowledge.
